

# Architecture

**EPCM** Architecture is a dynamic design office that provides professional architectural services as standalone to clients, as well as inhouse part of EPCM's Group project offerings.

From conceptual designs and feasibility studies, regulatory submissions- and approvals, detailed designs, 3D and virtual reality visualizations to contract management and close-outs for construction, EPCM and EPC/Turnkey projects.

We utilize the latest technology, documentation and visualization tools to present projects to our clients through the complete project lifecycle. We are fully proficient and integrated with a variety of modern and internationally accepted design and drafting software. And on all our projects we utilize and consult on the current local, national and international standards, guidelines and best practises.

**Our architecture industry experience and expertise extend to:**

- Retail Fuel Stations
- Industrial and Mining Facilities
- Tank Farms and Storage Depots
- Private Educational,
- Multi-Unit Residential
- Middle Class and Luxury Residential
- Commercial
- Private Health Care

We understand the place and design of each project and how to deliver each unique project based on its diverse market. Through the holistic and poetic combination of form and function, curious enquiry, adaptability and a deep understanding of human, spatial, cultural and material value EPCM is able to create appropriate and celebrated architectural solutions.

Working alongside experienced and forward-thinking engineers of all disciplines, EPCM Architecture is well equipped to realize any type and scale of project.
