

A large offshore vessel is under construction on a shipyard. The vessel is white with a red hull and is supported by two tall, black vertical cranes. The shipyard is situated on a sandy beach next to a body of water. In the background, other industrial structures and cranes are visible under a clear blue sky.

Fabrication

EPCM Holdings offers fabrication services for virtually any size project. From modular gas processing skids to large-scale material handling and mining equipment. Both for the on- and offshore markets.

Our team of in-house professional engineers provides engineering design input and backup to all projects, allowing us to execute them as fabrication-only projects and on a full EPC/Turnkey basis.

EPCM Holdings has multiple fabrication yard facilities in South Africa, Mozambique, Nigeria, and UAE, from where we assemble, fabricate,

and ship units globally to their final destination.

Our UAE facilities (Dubai, Jebel Ali and Abu Dhabi) offers large-scale fabrication capabilities through our Joint Venture with Fabtech International, one of the largest Middle-Eastern based yards. This JV joins EPCM's Engineering and Fabtech's fabrication capabilities into a one-stop EPC solution provider. It offers design, fabrication, procurement, construction, installation, and maintenance to the up- mid- and downstream clients in the Middle Eastern region.

All our facilities carry the necessary management and fabrication certifications and procedures, complying with industry best practices and international standards of work.

Our workforces consist of locally recruited, trained, and developed labourers and artisans.

Facility Details

South Africa

Workshop Pretoria: 4,000m²

Workshop Durban: 2,400m²

Workshop Richards Bay: 1,500m²

Workshop Secunda: 400m²

Nigeria

Workshop/ Yard/ Warehouse (x4) Port Harcourt: 13,000m²

Workshop/ Yard Port Harcourt: 18,000m²

Mozambique

Yard: Matola

Workshop: Vilancoulus

UAE (under the formal Fabtech-EPCM Joint Venture)

Fabrication Facilities Jebel Ali: 100,000m²

Fabrication Facilities Dubai: 300,000m²

Fabrication Facilities Abu Dhabi: 50,000m²
