

Scaffolding

EPCM offers the design, supply, erection, certification and dismantling of scaffolding as an extension to our construction services. This puts us in a unique position whereby we are able to provide our clients with a direct, high quality and certified scaffolding solution, without the challenges of dealing with third parties and or subcontractors,

Our management team has decades of experience in the scaffolding industry. This experience enables us to provide a professional and reliable service to our clients. All scaffold designs and certifications are performed by our own team of competent engineers.

Our equipment certification, and our safety and quality procedures have been developed to ensure compliance with the local and global requirements and standards:

- Occupational Health and Safety Act
- Mine Health and Safety Act
- Construction Regulations 16
- SANS 10085
- SANS 9000 / ISO 9000
- SANS 10085 - 1: 2004

Regular and statutory inspections of our equipment are performed to ensure that the best quality equipment is available at all times. Further, our scaffolding teams are kept up to date with all training requirements and exposure to global best practices.

We supply, erect and dismantle scaffolding for clients in the following industry sectors throughout South Africa and Africa:

Industrial

Oil and gas

Petrochemical

Marine

Aviation

Construction

Offshore

Mining

Commercial

Within these industries we offer our scaffolding services for projects, shutdowns, maintenance work, statutory inspections and wherever access is required.
